MEMORANDUM FOR: Deputy Director for Support

SUBJECT : SIPS Requirement for "49 CT Reports"

Jack:

Some days ago you queried me on the SIPS requirement for "49 CT reports." I followed up on this not only because of your query but because I share your concern about excessive demands on the system for reports that are used infrequently. It was my thought that those used infrequently would be cancelled and the requirement met by "call-up" on a CRT.

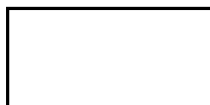

STAT

[] explained that his question to you about the reports (incidentally there are 31, not 49 CT reports and [] acknowledges the error) was based on the rumor that the CT Program was to be dropped. He was not complaining about the number of reports for a going program, but was indicating the work load to be saved if the Program was discontinued.

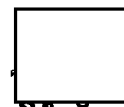

STAT

STAT

Mr. [] does not recommend that we attempt to reduce the number of CT reports at this time. Further, and I will follow-up on this with [] he urges strong skepticism about eliminating any of our present reports before we are sure of the capability of the new system to produce answers on call.

Harry B. Fisher
